INTRODUCTION

The 1984-85 Pennsylvania Public Library Statistics publication was compiled by the Bureau of Information Systems, Department of Education. The data was taken from the 1984 and 1984-85 Public Library Annual Reports. Libraries that filed a 1984 Annual Report reported on 1984 local income and expenditures and 1983-84 state aid income and expenditures. Libraries that filed a 1984-85 Annual Report reported on 1984-85 local income and expenditures and 1984-85 state aid income and expenditures.

Because libraries maintain a calendar year or a fiscal year accounting schedule, the total state aid income and expenditures in this publication do not match the state aid appropriation for either 1983-84 or 1984-85.

The publication separates statistics of state aided libraries and non-state aided libraries. Part I and II include state aided library data. Parts III and IV include non-state aided library data and a combined total of all libraries.

Part I is separated into four Tables and provides data on Registration & Staff, Collection & Circulation, Income and Expenditures of all state aided libraries. The information is arranged alphabetically by county and by the municipality in which a library is located. System headquarters libraries are identified by an "H" preceding the library location. An "M" identifies a system member library.

Part II provides the same statistics as in Part I on a District Library Center level. These figures are a total of data from all state aided libraries in the district.

Part III provides the same four Tables and catagories of information for non-state aided libraries as listed in Part I. Information is in alphabetic order by county and municipality in which the library is located.

Part IV provides the same information as in Part III on a District Library Center level. The combined totals of both state aided and non-state aided libraries are included as the last line of Part IV.

Part V - In this part, state aided libraries are grouped according to the size of service area. Information listed includes library expenditures, circulation, cataloged items and the per capita rate for each of these data elements. Turnover rate is also given. Following each group of libraries is an average for each data item.

Part VI provides the same information from library systems as in Part V. The system statistics used are a total of the data from system headquarters and member libraries.

Information for bar charts and pie charts reflect the combined statistics of state aided and non-state aided libraries.

Definition of Data Items:

Population served for a local library is considered the population of the municipalities the library serves freely. For members of library systems, it is the population which has predominant access to the library.

This population figure is used to compute all per capita calculations.

In counties where service areas overlap, the total county population of the latest census figures is used. The population served by a county library is generally the county population less the population served by other local libraries in the county.

Hours open: The number of hours a library is open on the regular weekly schedule, usually winter hours.

Registration: Two columns of statistics record the number of new borrowers registered during the year and the total as of the end of the year.

Staff: The number of full-time equivalents based on at least a 35-hour work week. The employes are classified by education or certification. The other category includes clerical staff and others who do library work. Janitorial, maintenance and security employes are not included.

Volunteers: The data for volunteers is reported in full-time equivalents, counting only those who regularly work five or more hours weekly.

Catalog Items E.O.Y. (End of Year): The figures show the total number of items in the library's material collection, including those of branches, bookmobiles and other outlets.

Periodicals: For individual libraries, generally the figure is the total number of titles currently received by the library. In some cases, it may be the number of subscriptions.

Circulation: The total of books and other materials lent by the library during the year and the number of items per capita.

Turnover Rate: This figure is determined by the Total Circulation divided by Cataloged Items E.O.Y.

Interlibrary Loans: The number of items of materials lent and borrowed by each library.

INCOME CATEGORIES - All figures are rounded to the nearest dollar.

Local tax: Total tax income or appropriations from local government units and school districts. Included in this figure is the School Board and Indirect Federal Aid amounts.

State aid: State aid received by a local library, county library, district center and regional library resource center. Included are state funds received by the Carnegie Library of Pittsburgh and the Free Library of Philadelphia to operate libraries for blind and physically handicapped persons.

Federal aid: Money received under the Library Services and Construction Act and similar federal programs, excluding revenue sharing money.

Other: Funds received from all other sources such as endowments, United Fund, fund drives, gifts, fines, fees and so on.

School Board: Money received from school districts is isolated under this heading. School district income is also included under the heading of Local Tax.

Indirect Federal Aid: Money not specifically intended for libraries and received indirectly under federal programs through municipal governments or other agencies. Included are revenue sharing funds and the salaries of employment program staff assigned to the library. These funds are also included under the heading of Local Tax.

EXPENDITURE CATEGORIES - All figures are rounded to the nearest dollar.

Wages and salaries: Wages, salaries and fringe benefits, of all Library Staff including janitorial and maintenance staff.

Library Materials: The expenditures for books, periodicals and other library materials.

Other operating: Expenditures for utilities, rent, supplies and other miscellaneous purposes. The amount includes expenditure for furniture, equipment, repairs and alterations.

Total operating: The sum of the previous three columns.

Operating per capita: This figure is based on the Total Operating category and Population Served.

Capital Expend: Monies expended for land, new buildings, alterations or new additions which add new floor area, and for the initial furniture and equipment for the new area.
